OBJECTIVE

Seeking a gameplay or software co-op or internship, January to August 2027. U.S. permanent resident.

EDUCATION AND AWARDS

Rochester Institute of Technology **Rochester, NY**
Bachelor of Science, Game Design and Development *Anticipated August 2027*

- GPA: 3.860
- Japanese language immersion (3 courses)
- Recipient of the RIT Trustee Scholarship (merit based)
- Dean's List every semester (Fall 2024 - Spring 2026)

Queensborough Community College **Bayside, NY**
Coursework in Liberal Arts and Sciences (Mathematics and Science) *August 2021 - May 2022*

- GPA: 3.815

SKILLS

Programming Languages: C#, JavaScript, C++ (coursework)
Engines & Tools: Unity, Netcode for GameObjects, Git, GitHub, Visual Studio, Maya
Web: HTML/CSS, Chrome Extension APIs (Manifest V3)
User Research: playtesting, player interviews, surveys (coursework)

PROJECTS

Douminuo (Chrome Extension)
JavaScript, Chrome Extension APIs

- Launched and maintain a solo Chrome extension for smartnuo, a Korean competitive Pokémon site, with about 160 weekly active users and 470 installs over 12 releases since April 2026.
- Shipped live damage and bulk calculations covering about 60 abilities and 30 items, and moved all UI into the site's own layout and design tokens.
- Cut added server load to zero: copying a team went from up to 8 requests to none, and the first calculator run from about 100 PokéAPI calls to none.
- Restored every feature within a week after smartnuo's Nuxt 3 rebuild broke the extension.

Trashpunk 2077 (Cooperative Multiplayer Game)
Unity 6, C#, Netcode for GameObjects

- Own the space station and mission systems on a 7-person class team (Fall 2026).
- Synced station resources and repairs across up to four players with NetworkVariables, NetworkLists and server RPCs, keeping the host authoritative.
- Built the round system: the host runs mission timers, and endless random rounds are generated identically on every client.

Touch the Grass (3D Environment Showcase)
Unity, Maya, C#

- Modeled every asset in Maya and lit the scene in URP with dynamic lighting and post-processing.
- Scripted player movement, door interactions and sound triggers in C#.
- Selected by professor as a future class example for 3D modeling/Unity workflows.

EXPERIENCE

RIT Dining, The Commons **Rochester, NY**
Student Employee *August 2026 - Present*

Republic of Korea Army **Paju, South Korea**
Infantry (mandatory service) *September 2022 - March 2024*

- Received a Company Commander Commendation.
